

11/16/2023 Meeting Notes -

CD: Vinayak Nair, D/D: Brett Davis

Takeaways

- Loved the look of the site - matched the mockup pretty well
- Solid, not too light, but not too menacing amount of content on each page.
- Margins should be consistent across every page - they aren't consistent across some of the pages on the site currently.
- Really like the favicon in the tab
- Big fan of many of the simple tweaks on the site like the color selected when clicking on a particular tab on the site.
- Interested in seeing how the website will respond to mid-window lengths because there is not much space in the nav bar after a certain point(there is a lot of text)
- See more could be collapsible and it would look nice if it expanded, but don't worry too much about it for the mobile view - it could come across as a very cluttered look.
- Linking the text "Functional Near-Infrared Spectroscopy" to the Description page
- Hover/Active states for button at the bottom would be nice
